

EAS Batteries GmbH is a manufacturer of large format cylindrical lithium-ion cells and battery systems, which are used in industrial, aviation, marine and automotive sectors. Thanks to the flexibility of the production line, EAS can adapt its products to special customer requirements and is the ideal partner for customized cells and battery systems for demanding requirements as well as for cell and battery development projects.

To strengthen our team we are looking for a Battery Systems Designer ¹⁾

Place of work: Nordhausen / Thuringia

Your field of activity

- Constructive design of battery systems and components
- Creation and maintenance of development documents, design drawings and manufacturing documents
- Carrying out FEM simulations
- Planning and coordination of design FMEAs

Your qualifications

- Completed technical studies (mechanical engineering, design engineering, mechatronics or similar)
- Knowledge in the field of thermal/mechanical FEM simulations
- Ideally first professional experience in the development of battery systems
- A high degree of personal responsibility and structured way of working
- Good knowledge of German and English, both written and spoken

Our offer

We offer you a permanent full-time position, an attractive working environment, exciting development opportunities and a very good working atmosphere.

Would you like to join us in driving forward the development of innovative energy storage systems? Then we look forward to receiving your application documents by mail or e-mail (please send all documents together as one PDF file in the attachment) to:
